PLASTIC DISCLAIMER: Plastic that is not properly sorted becomes trash. There are no longer any local recycling services that have markets for plastics that are not properly sorted. Please note that no solid colored plastic is accepted in Flathead County--only Transparent Plastic: #1 (ie. Soda & water bottles, as well as food jars like applesauce jars & mayo—no clamshells or boxes) and Translucent Plastic #2 (ie. Milk, vinegar, windshield washer fluid jugs, etc.) The recommended best practice is to reduce your use of plastic in general and to bring reusable cloth bags to the grocery store.
¹ The difference in **paperboard** and **cardboard** cartons lies in how they are constructed. **Paperboard** is thicker than average paper, but it is still just one layer. **Cardboard** is three layers of heavy paper, two flat with a wavy one in the middle.
